Report Brochure

Biological Drugs Trend Report

Products, Devices, Players, and Markets
**Biological Drug Evolution**

In recent years, the number of biological drugs in development and reaching the marketplace has increased significantly. Keeping track of this market segment is becoming more challenging. This report combines all of the essential information in on place. You’ll find answers to questions such as, ‘Who supplies the API, the final product? How much is sold? How much will be sold? What are the industry partnerships? What is the role of company subsidiaries? How are they packaged and delivered? What are their indications?’, as well as answers to many more questions?

**Market-driven Product Strategies**

A longer life span is expected to translate to a growing number of patients diagnosed with chronic conditions. To counteract the financial and medical infrastructure implications of this trend, pressure from the public sector and managed care organizations will place a premium on therapeutic ease-of-use and promote therapies that are patient-friendly and cost-effective. Pharma and biotech company decision makers have come to the realization that for many products, success no longer only depends on the medication itself but also on achieving a caregiver and consumer-compatible form of packaging and application.
‘There are 278 approved biological drugs that are approved by the FDA and EMA, and several hundred more winding their way through the development pipeline. The way these drugs are sourced varies widely. This report includes detailed graphical and tabular information and data on all approved biologicals. With 240 pages and 232 charts and tables, it’s been designed to allow users to find product and supplier details as well as gain insight into the higher level industry trend shaping this sector.’
Our reports are carefully researched and written to provide timely and insightful analysis of key factors and developments shaping the commercial marketplace. The focused nature of our publications is designed to allow readers to identify emerging demand and growth opportunities in selected markets. Numerous charts, tables and graphs complement the text, with evaluations and assessments of current and probable future market developments, technology issues and business factors - information necessary to compete effectively in the global marketplace.

What You Will Learn

- What are the drug details for all biological drugs approved by the FDA and/or the EMA?
- What are the activities of biotech and pharma companies operating in the biological drug space?
- What are the essential elements of each approved biological drug – host vector, RoA, API, primary packaging?
- What are the facility activities for each biological drug market participant?
- How are biological drugs administered? What is the as-supplied device packaging?
- What are the historical revenue and forecast revenue for each biological drug?
- What are the key supplier relationships in the biological supply chain?
- What is the current approved biosimilars environment?
- Who are the significant players in this segment?

Report Value Chain – Who Should Read this Report

Development
- Drug Developers
- Device Suppliers
- CMOs
- Components/APIs
- Testing/Validation
- Clinical Trial Mgmt

Industry
- Pharma Managers
- Biotech Managers
- Drug Marketers
- Industry Strategists
- Financial Analysts
- Management Consultants

Market
- Clinical Managers
- Drug Distributors
- Pharma Regulators
- FDA Consultants
- Managed Care Managers
Greystone Research Associates

Report Format and Availability

This report is available electronic format. A single user license as well as licenses for multiple users are available. Custom licensing options to address specific company user requirements are available by calling client services at 603-595-4340, or by emailing clientservices@greystoneassociates.org.

Methodology

Research methodology is based on primary research in the form of in-depth interviews with key market participants, technology developers, distributors, industry experts, and market influencers, a list that includes regulatory officials, industry trade groups, and materials standards organizations.

Primary data is evaluated and normalized against secondary sources including trade journal articles, technical literature, industry publications, company data sheets and published information, and statistical data from government agencies and trade associations. Forecasts and projections of market

Greystone Research Associates

*Greystone Research Associates is a medical technology consulting firm focused on the areas of medical market strategy, product commercialization, venture development, and market research. We assist medical and healthcare market participants in achieving their business objectives through the creation of detailed development strategies, product commercialization programs, and comprehensive market and technology research and analysis. Our market research publications are designed, researched and written to provide timely and insightful information and data on focused market segments, with the aim of providing market participants with the essential knowledge to refine and execute their marketing plans and financial targets.*
Orders may be placed via postal mail, e-mail or fax. Orders not accompanied by a purchase order must contain a telephone number for verification, and clearly indicate the physical shipping address. Orders which are not prepaid must indicate the billing address.

**Payment**

We accept the following forms of payment:

**Company Check**: Please make checks payable to ‘Greystone Associates’

**Credit Cards**: We accept MasterCard, Visa and American Express

**Wire Transfers**: See ‘Wire Transfers’ below for more information

**Orders Outside the U.S.**

Orders must be prepaid via credit card, company check in US funds and drawn on a US bank, or wire transfer.
